If the Heat "Does You Up" Try Cantilever Shoes
Cantilever Shoes are so comfortable that they afford great relief from the "done up" feeling that hot weather brings. Cantilever Shoes are restful because they are built to encourage correct carriage. The heel is slightly higher on the inside than on the outside. The weight of the body, instead of falling on the weak point of the arch, is shared by the heel, the ball, and the outside of the foot. This proper balance helps to prevent fallen arches. There is plenty of toe room. The toes point straight ahead in their normal easy position. The flexible shank allows the muscles which surround the bones of the arch to exercise and keep strong. Cantilever Shoes thus preserve the natural strength of the foot arch. By wearing these shoes you protect yourself against a widespread ailment—weak arches. And in combination with all these features for comfort and health, Cantilever Shoes possess good looks. The trim lines are graceful. Widths from AAAA to E.
